

Introducing the New Generation of **Geo** Weights

Engineered in Steel | Built for the Future

2025

**We're proud
to be a company
with heritage —
built by drillers,
for drillers.**

At Geo Weights, we're proud to launch our latest innovation — precision-engineered **steel** weights for geothermal loop installations. Combining performance, sustainability, and reliability, our new design delivers the quality and efficiency for your clients/projects and their demand.

Our deep industry experience means we understand geothermal installations inside and out, and we know exactly what our clients need to get the job done efficiently, safely, and on time — **anywhere in the world.**

Built for Seamless Installation

Key Features:

- **Precision Engineering**
Each weight is crafted with domed and coned ends for smooth insertion and is equipped with certified M10 lifting eyes for secure and easy handling.
- **Universal Compatibility**
Designed to work effortlessly with geothermal loops from all major manufacturers.
- **Flexible & Scalable**
Need more weight? Simply shackle units together using standard hardware — no complex tools or fittings required.
- **Slim Profile**
Engineered for easy handling and minimal resistance during installation.

Product Specifications

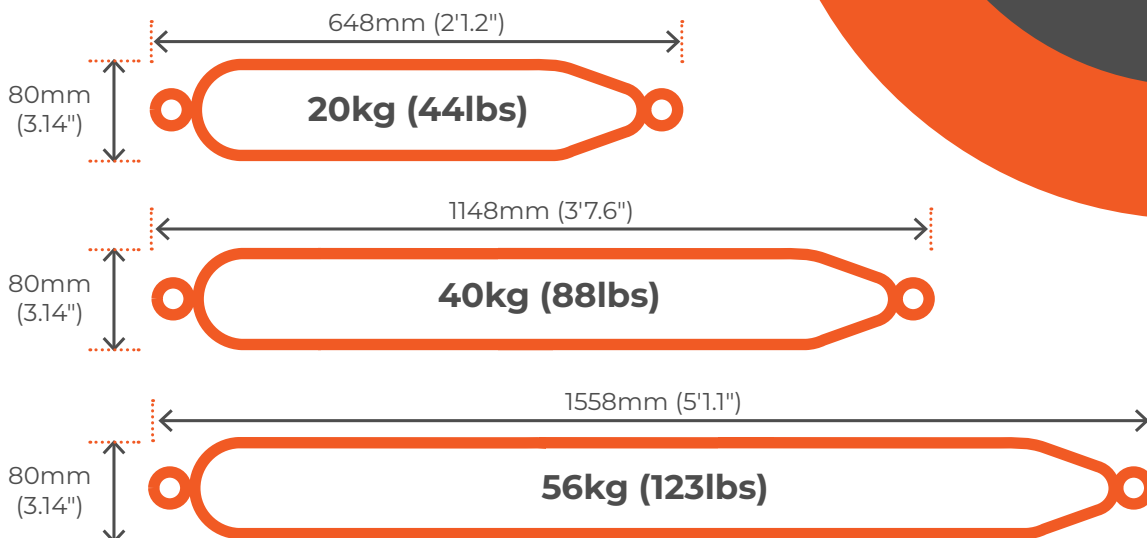

Standard Steel Geo Weights Available:

- 20kg (44lbs) – 648mm (2'1.2")
- 40kg (88lbs) – 1148mm (3'7.6")
- 56kg (123lbs) – 1558mm (5'1.1")

All with a uniform diameter of 80mm (3.14")

Customisation Available

Need a different length or weight? We offer tailored solutions to meet the unique demands of your project.
